

Billy (仲廷)

Although I have less experience as a frontend engineer, I invest a lot of effort in coding and enjoy during the process. I also make open source contributions in my spare time.

Taipei (or Taoyuan), TW

Education

B.S. degree in Department of Information Management, National Taipei University of Business (NTUB).

I have graduated in June 2019.

Learning how to set up a server with Linux, write a spider in python, create a simple website, etc. Actually I don't think what I learned from school is really enough or useful, but it gave me a chance to try it. Fortunately I found I'd like to work with these skills. By the way, I joined a basketball team of department. I even became a team captain. Sometimes it's hard, but it's also a unique experience to me.

Skills

Layout

- HTML
- PUG
- CSS
- SASS

JavaScript

- Vue.js
- React.js
- Node.js
- JQuery
- TypeScript
- Testing

Others

- Git
- CLI

Experience

Galaxy Software Services Corporation , Mar 2019 - Present

Frontend Engineer Intern - Maintain and develop large applications:

- Communicate with UI/UX designers and Creating new features
- Fix bugs of existed projects
- Writing tests to refactor safely
- Writing project documentation

Tapbee Inc. 02, Aug 2018 - Mar 2019

Research Development Intern - Develop new product

- Usually focused on client side (frontend)
- Sometimes develop some backend apis with Node.js

Projects

Vital BizForm

A cloud application for user to manage their business form.

It was the first project I tried to use React. I discovered some new stuff during the process. I found I like React as much as Vue, so I'll keep diving into both.

Leveraged skills :

[React.js](#) [React Hooks](#) [Redux](#) [styled-component](#) [TypeScript](#) [RxJS](#)

FormEditor

A web application for user to layout a form template online themselves.

It was already an existed Application when I started working on it. I found It was quite complicated to me and I learned a lot by understanding the code and logic.

Leveraged skills :

[Vue.js](#) [Vuex](#) [ElementUI](#) [SASS](#) [Unit tests](#)

Vocabulary-admin

A website developed just for myself to improve my English ability.

Actually it's improving not only my English but also my programming skills, since Sometimes I'll try to use some new stuff with this project when I discover it.

Leveraged skills :

[Vue.js](#) [Vuex](#) [ElementUI](#) [SASS](#) [Unit tests](#) [Firebase](#) [Pug](#)

Tapbee Cart

A simple small shopping website used as a webView && An admin website for managing goods

I chose to leverage Vue since I had just learned it. It made me more familiar with Vue during the process.

Leveraged skills :

[Vue.js](#) [Vuex](#) [ElementUI](#) [Pug](#)

AUO Lohas

An app which is like a social media, but just for employees of the company.

It's a multiple pages application and I was in charge of the frontend part independently.

Leveraged skills :

[HTML](#) [SASS](#) [JavaScript](#)

S&D coffee

An app of a chain coffee shop.

It was already an existed App when I started working on it. I optimized the App ,fixed some existed bugs and created new features such as paying online,.

Leveraged skills :

[HTML](#) [SASS](#) [JavaScript](#) [Cordova](#) [Node.js](#) [Express.js](#) [MySQL](#)

Self.Vietnam

My independent study.

I was in charge of the frontend part. It's a multipage website build with PHP to introduce Vietnam.

Leveraged skills :

[HTML](#) [SASS](#) [JavaScript](#) [Google Maps API](#)
